UNDERWATER LIGHT

LAST UPDATE: 11-11-2025

A family of recessed and surface mounted under water luminaires which are commonly used to illuminate swimming pools, decorative pools and fountains. Accessories include several watertight connecting devices. ACQUA1 utilizes high power LED in 2700K, 3000K or 4000K and high quality optical lenses offering narrow, medium, wide and elliptical beam. Version with GU5.3 lamp holder for MR16 Led retrofit lamps is also available. To avoid installation issues and add another level of safety, ACQUA1 is pre-wired and is fitted with an anti-condensation device. To avoid over-heating of the luminaire body, ACQUA1 must be operated in a submersible state at all time. The marine grade 316 stainless steel body guarantees corrosion free appearance throughout the life time. We highly recommend that the luminaire lay out should be considered during specifying and planning processes. Installation work must be carried out under national safety regulations.
